Profile Series Legacy Display Panel

Note: Wiring greatly simplified for clarity. Refer to full owners manuals for complete wiring instructions.

Profile Series Display Panels

The **Profile Series Legacy** display panel features our exclusive **EZ-Profile** algorithm which corrects for odd-shaped tanks and sensor types. This panel is also compatible with nearly all sensor types available on the market today making them easy to both retrofit into an existing system or to install new.

Basic Features:

- Simple to install, setup and operate.
- Compatible with capacitive level sensors, 240-33 Ohm float sensors, and 0-90 Ohm LPG sensors.
- Features our exclusive **EZ-Profile** software algorithm which corrects for odd tank shape and sensor type.
- Autonomous monitoring and out-of-bounds alarms.
- Panel will monitor liquid levels for 1 to 8 tanks.
- Data is displayed on a 4x20 backlit LCD display.
